The LS640 mounting system is designed to provide an easy installation solution for Lumascope's LS343 inground product series. The system provides essential benefits for installing and subsequent removal of the LS343 inground uplights. Firstly, it allows for a clean template placement in your mounting surface prior to fixture installation. Secondly, the LS640 system provides the necessary support to allow the LS343 series to be mounted in areas where there is potential for drive over. Finally, the full LS640-K mounting kit supplies all that you will need to mount directly into a poured concrete base allowing for a last in approach for the mounting of the LS343 lighting fixtures.

### LS640

This accessory comes with these components:

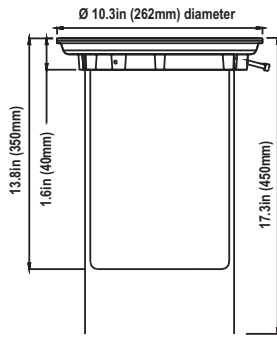

- pressure die-cast brass mounting ring
- side entry, ground gripping screws

### LS640-K

This accessory comes with these components:

- pressure die-cast brass mounting ring
- side entry, ground gripping screws
- stainless steel concrete cavity burial sleeve
- submersible quality IP68 snap connector on a lead complete with 3 way junction box
